**Mobile Medical Associates (MMA)**

**Sharon Vitale is a Board Certified APRN** and an active member of the American Academy of Nurse Practitioners. As an honors graduate of Stony Brook University in NY, Sharon holds a Bachelors of Science and Masters of Science degree in Nursing. She has been providing services to residents in ILFs, ALFs, SNFs and independent homes since 2011, with advanced training in wound care and as a specialty of Dermatology.

Skin cancer is the most common type of cancer in the United States. Skin exams are the best ways to find skin cancers early. Most skin cancers are highly treatable. The earlier a lesion is detected the easier it is to treat. Most skin cancers occur due to overexposure of ultraviolet radiation from the sun's natural light or tanning beds. Know your skin. Freckles, blemishes, patterns of moles or other marks on your skin. Moles that are new or changing should be examined by a professional. Skin exams are essential to your ongoing health.

// a full body  
skin exam could  
save your life //
